sustainable building innovations

Webinar – Building Information Modelling

12/12/2023

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

AGENDA

- Welcome & Introduction
- About InCUBE
- What is Building Information Modelling?
- BIM Tools and Technologies
- 3D Surveying: Data gathering for BIM
- BIM Case Studies
- Q&A Session
- Closing Remarks

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

INTRODUCTION

CEO Architect

Guillermo Martinez

BIM Director

**Elisa Mariarosaria
Farella**

Researcher

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

UNLOCKING THE EU RENOVATION WAVE

An **inclusive toolbox** for accelerating and smartening deep renovation

InCUBE envisions to unlock the EU renovation wave through

cutting-edge standardised and integrated processes

based on industrialisation, innovative renewable energy technologies, digitalisation, and new market entrants.

InCUBE strives for **social inclusion, upskilling, and**

supporting women in the construction industry.

The InCUBE solutions will be demonstrated in 3 large-scale demo sites: Zaragoza (ES), Trento (IT) and Groningen (NL).

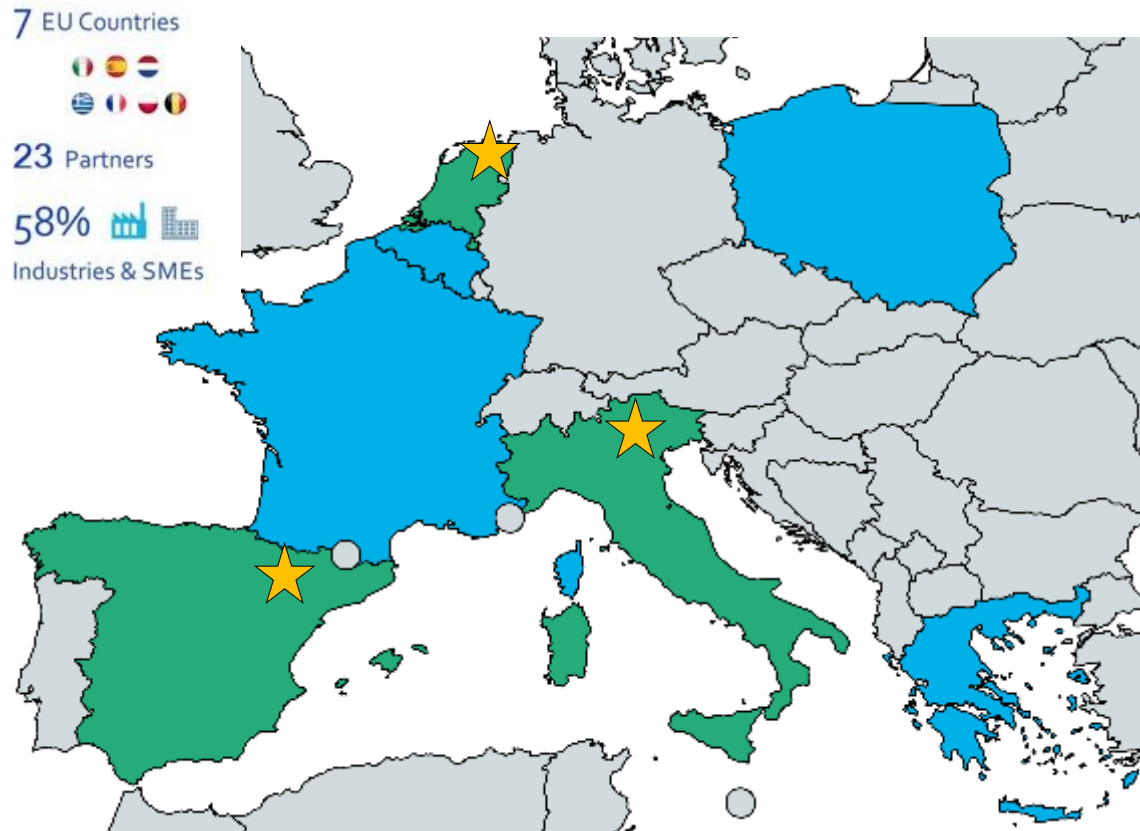

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

ABOUT

InCUBE brings together **23 high-profile partners** and two affiliated entities from **7 European countries**.

Funded by	European Union
Programme	Horizon Europe Research & Innovation
Start project	July 2022
End project	June 2026
Budget	~€10 million
EU Funding	~€8 million

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

KEY EXPECTED OUTCOMES

35%+

Reduction of waste streams and time needed on-site

30%+

Reduction in renovation costs

50%+

Reduction in working time with hazardous activities

20%+

Energy performance gap between as-built and as-designed.

940 tCO₂ eq/yr

Greenhouse gas reductions

62%+

Energy savings per year

2000+ users

In two Renewable Energy Communities

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

THE PROBLEM AND THE NEED

Low rates of productivity & user satisfaction in the construction sector

- Market up-take of new, sustainable materials
- Industrialisation of deep renovation
- Upskilling workforce under a gender mainstreaming approach

Poor or no integration of solutions

- Improved integration of solutions and digitalisation of products and processes
- More attractive and affordable solutions

Limited information of building whole life cycle

- Integration of building related information
- Buildings and their users as active nodes of the energy system

Highly complex, fragmented and project-based process

- Bring together different actors of the construction sector
- Workflow optimisation

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

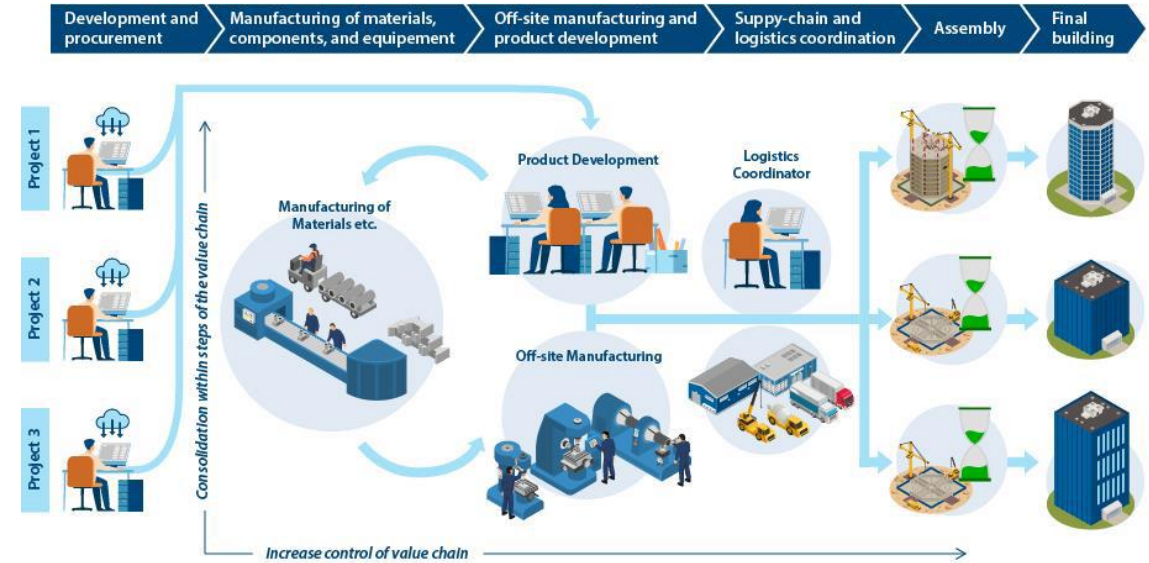

PROJECT PROCESS OPTIMISATION

Present

Future

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

INNOVATIONS

InCUBE envisions to unlock the EU renovation wave through cutting-edge standardised and lean integrated processes based on **4 key pillars of innovation.**

INDUSTRIALISATION

**NEW TECHNOLOGIES
AND MATERIALS**

DIGITALISATION

**NEW MARKET
ENTRANTS**

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

#1 INDUSTRIALISATION

InCUBE's process innovations support the **industrialisation of renovation** through solutions for:

Off-site manufacture

- BIM-based Design of Prefab Modules

On-site installation and automation

- BIM-connected Robotic Systems (Demolition, Construction and Drilling)
- Personal Protective Equipment (PPE) Monitoring System

Circular construction

- Construction Waste Sorting Robot
- Waste Tracking and Management

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

#2 NEW TECHNOLOGIES AND MATERIALS

InCUBE's product innovations support the **utilisation of new technologies and materials** such as:

Envelope material solutions

- Prefab & Modular Facades
- K-ROCK CNX – Mineral wool board

Renewable energy generation solutions

- BIPV pre-installed on Prefab Facades
- Tegosolar® BIPV Shingles

Solutions for renewable energy storage

- Smart Borehole Thermal Energy Storage

Advanced Heating, Ventilation and Air Conditioning Solutions

- Low temperature Ground Source Heat Pump connected to District Heating & Cooling

Cross-Cutting Solutions

- Low Temperature 100% RES District Heating & Cooling

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

#3 DIGITALISATION

InCUBE's software innovations support the **digitalisation of products and processes** such as:

-  Supporting for 3D building modelling & Digital Twins
-  Enhanced energy assessment and integrated energy management
-  Dynamic life cycle evaluations & Decision-Making Tool optimising renovation planning
-  Ensuring enhanced workers safety and increased efficiency
-  Offering augmented next-generation training and assistance
-  Smart Building Energy Management Systems focussed on energy communities
-  Enhancing the optimal management of distributed renewable energy sources
-  Optimising workflow and construction & retrofitting works

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

#4 NEW MARKET ENTRANTS

InCUBE's business innovations **support new entrants** through:

-  Renovation Marketplace for sharing information, knowledge and experiences
-  Novel Business Models including the formation of Renewable Energy Communities
-  Improve the gender mainstreaming in the construction and energy sectors to smarten and accelerate systems, products and operations
-  Training Modules with best practices for upskilling the current and potential workforce

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

INTRODUCING ESTUDIO

Metro7: Spanish architectural firm and construction company

InCUBE:

PASSIVHAUS

SUSTAINABILITY

SMART BUILDINGS

WELL

DESIGN

INNOVATION

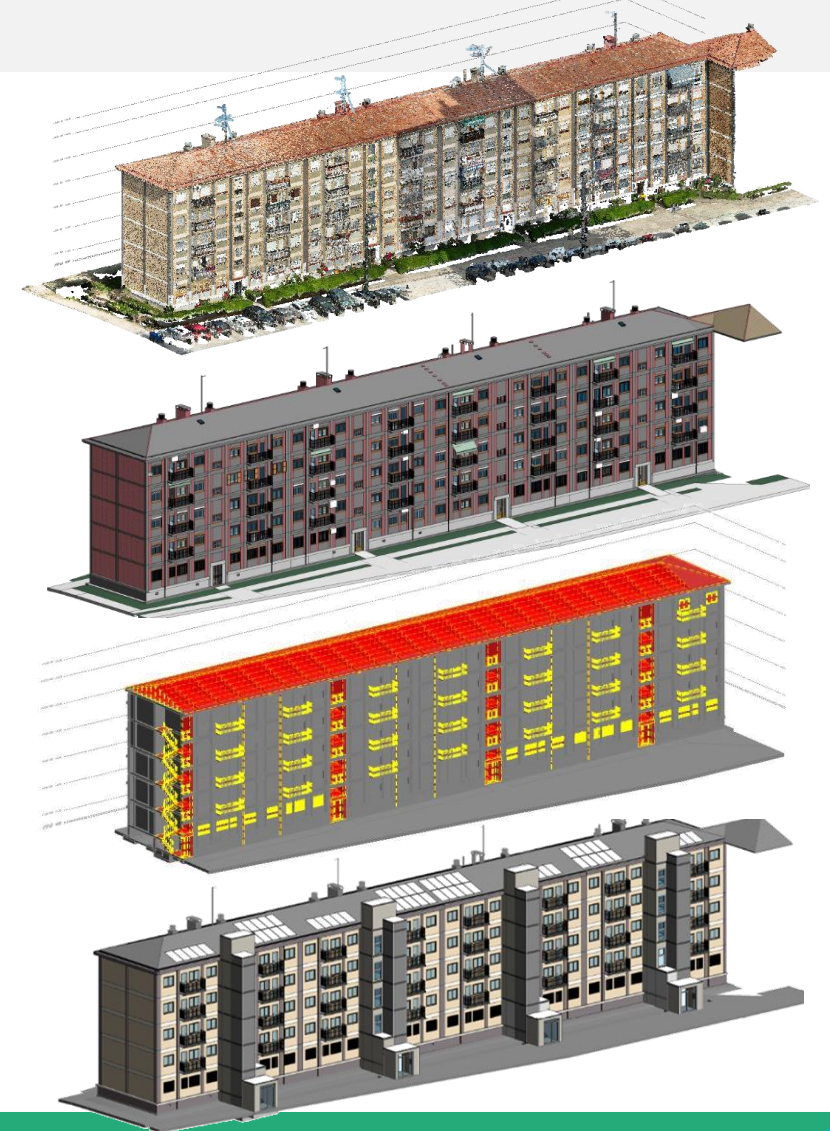

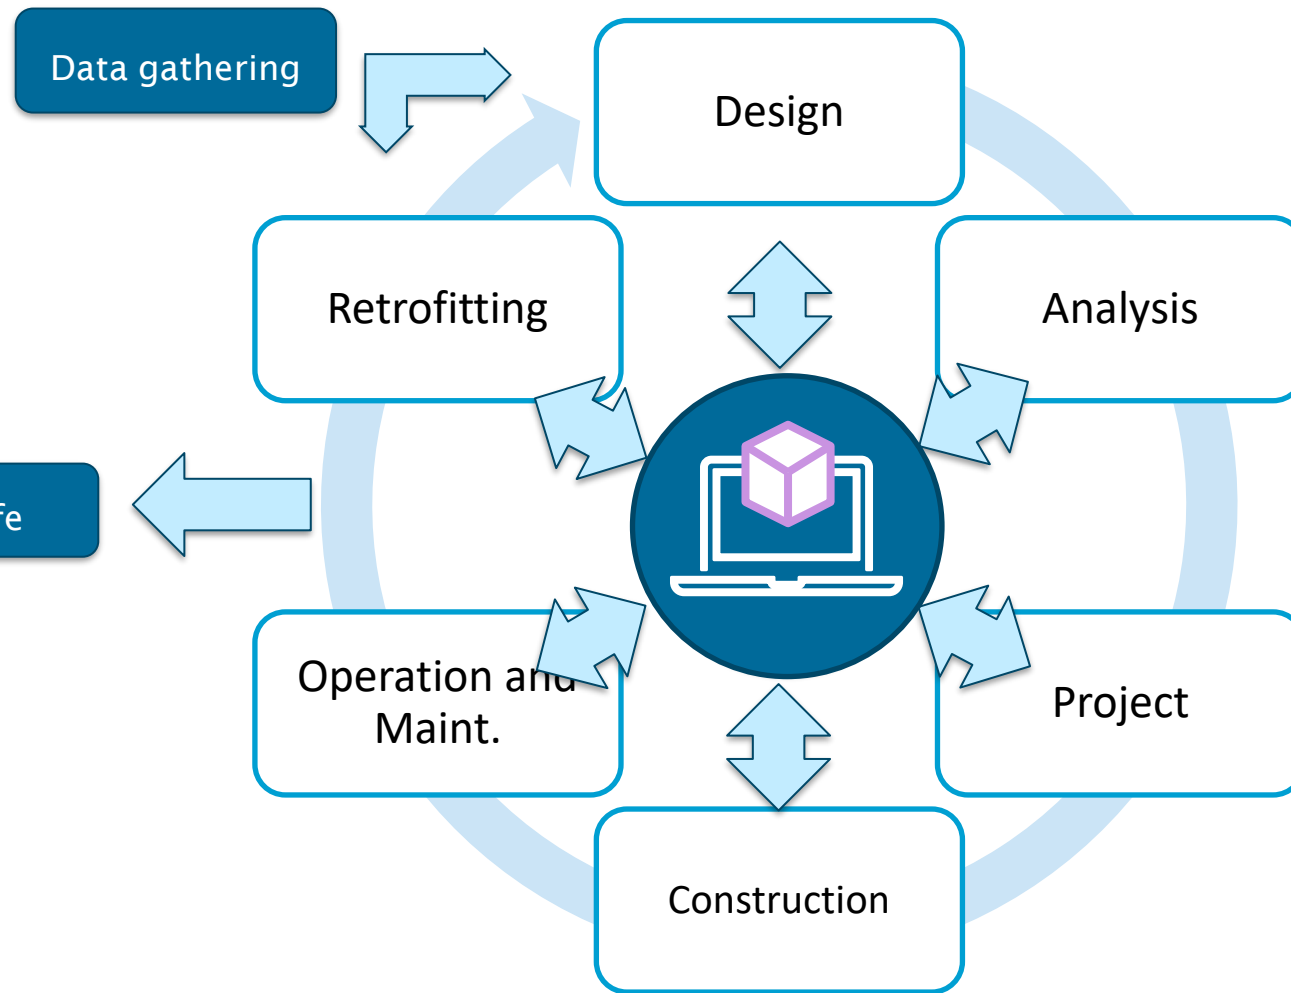

- Leading building mapping and BIM objects development tasks
- Coordinating Spanish demo site pilot and solutions
- Lean implementation: IPD, A3 and LSP driven renovation

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

WHAT IS BUILDING INFORMATION MODELLING?

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

WHAT IS BUILDING INFORMATION MODELLING?

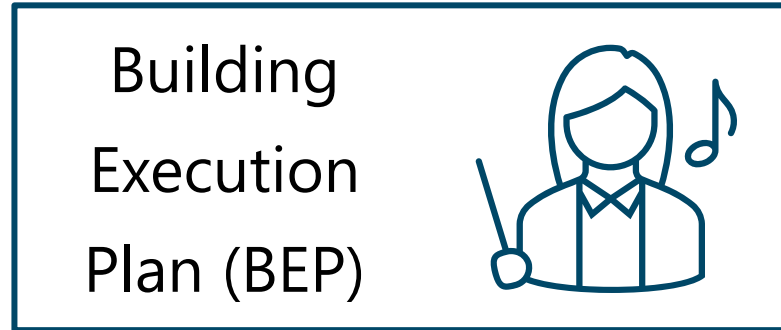

- Digital representation of a building. NOT only 3D modelling
- Allows creating and managing building assets
- Multi-disciplinary data
- Move up to city level: CIM

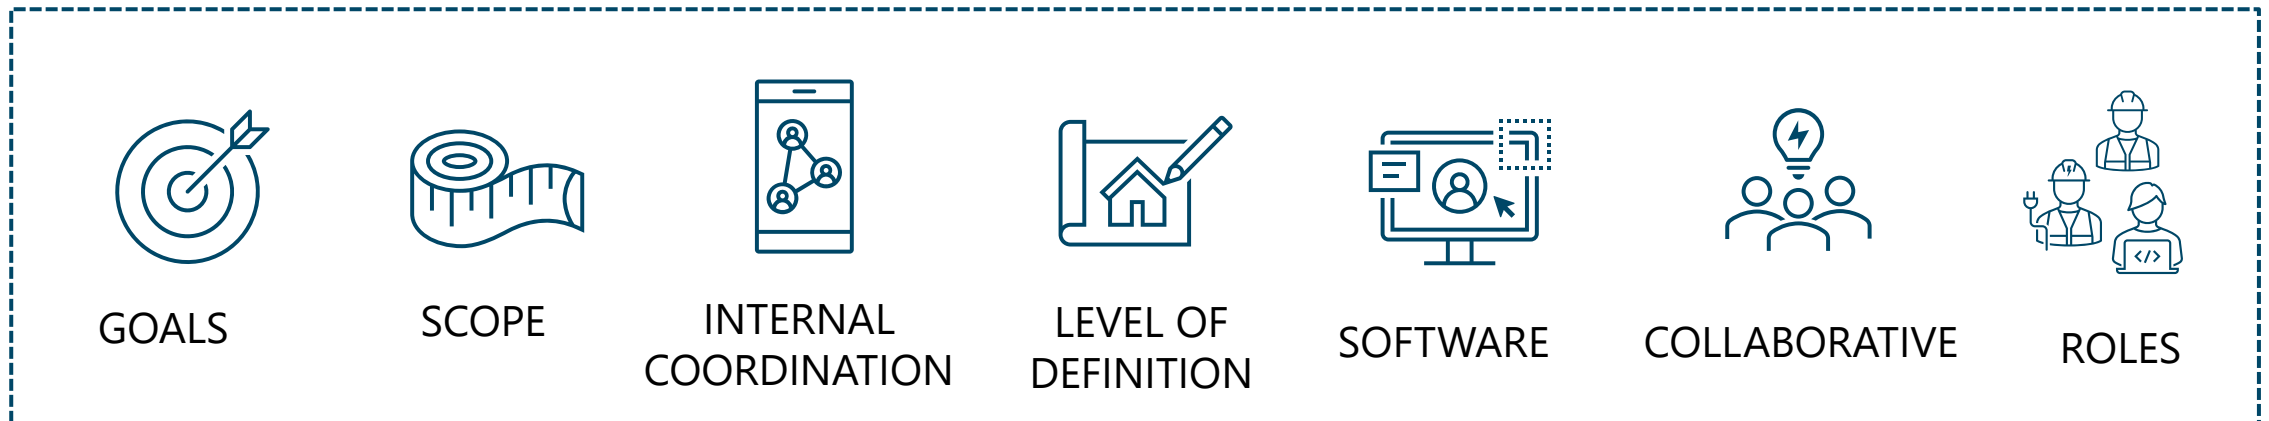

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

WHAT IS BUILDING INFORMATION MODELLING?

KEY ELEMENTS BEFORE STARTING

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

AVOID INFORMATION LOSS:

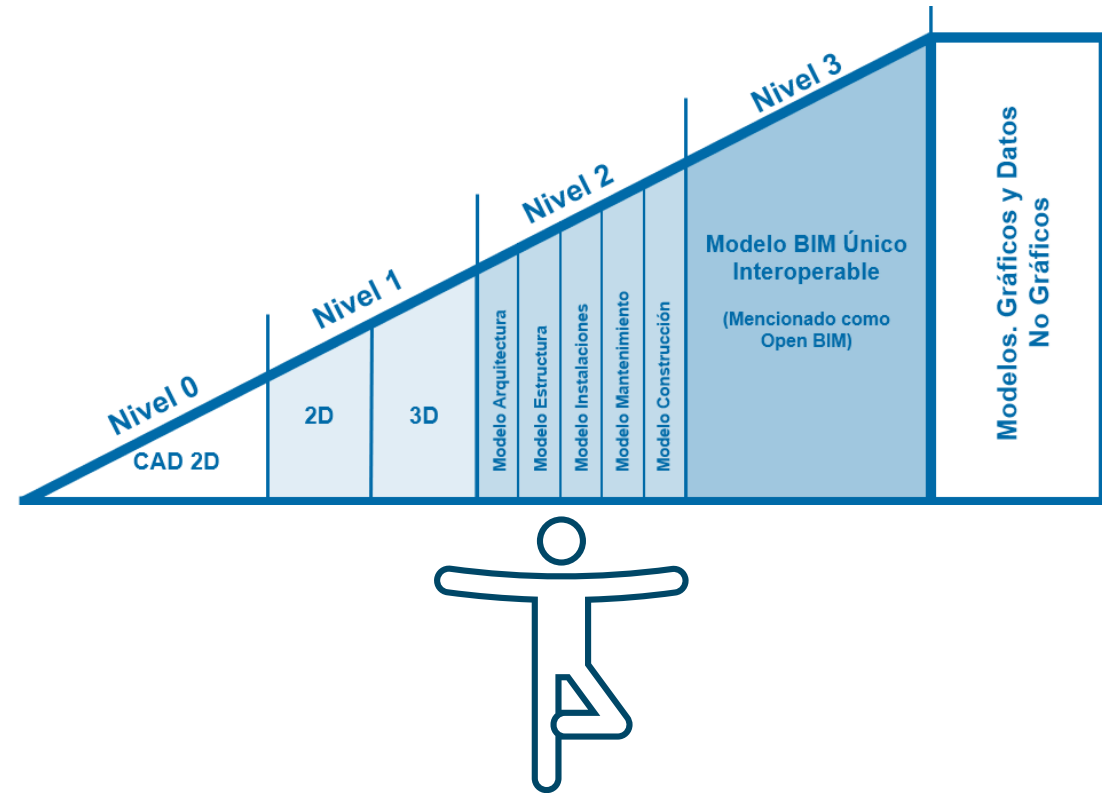

- Changing discipline
- Changing software
- Over-information
- Understand future uses

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

WHAT IS BUILDING INFORMATION MODELLING?

DATA SURVEY: more detail, less time, although initially is longer

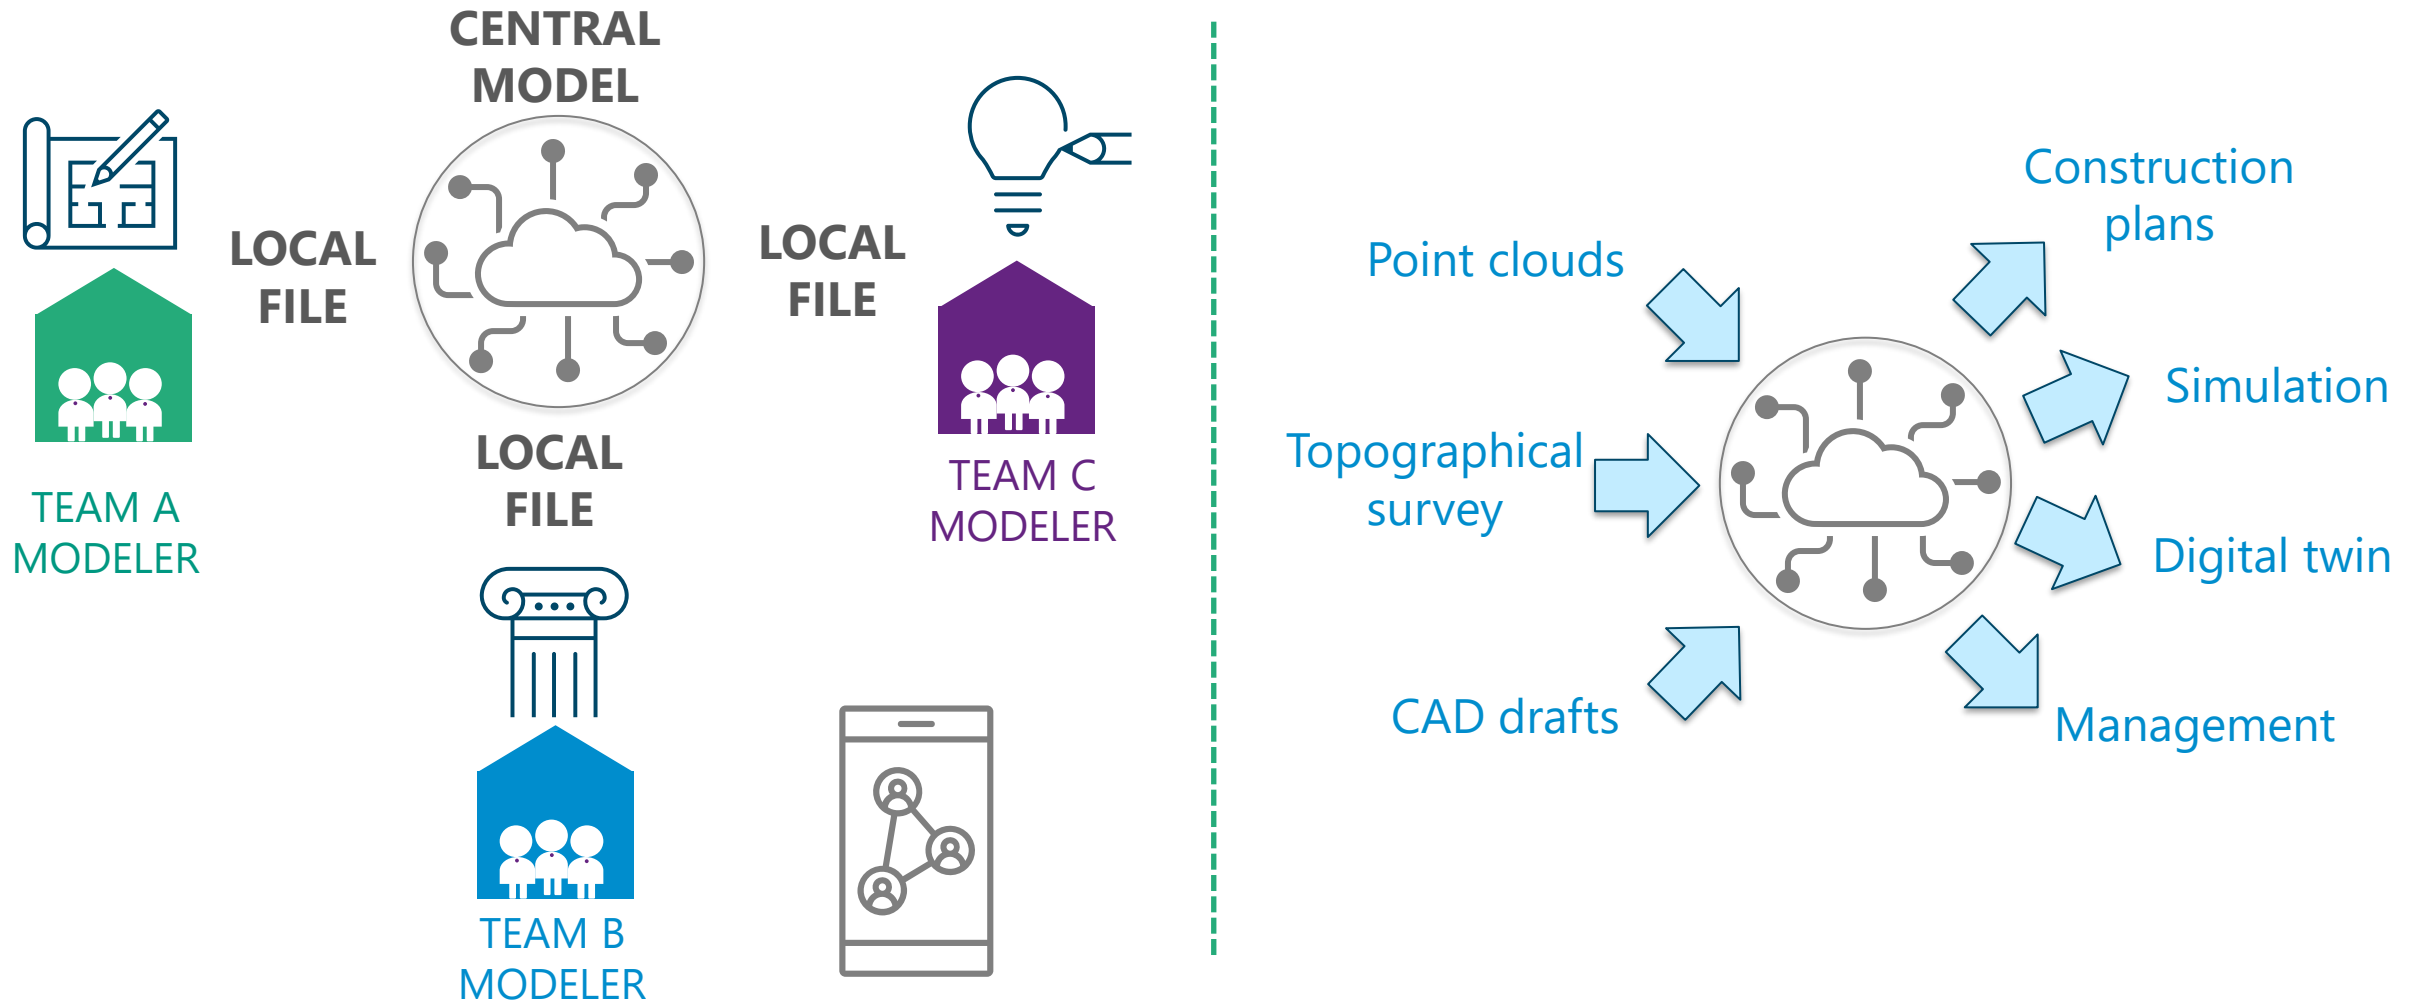

CHOOSE BEST INTEGRATION SCOPE

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

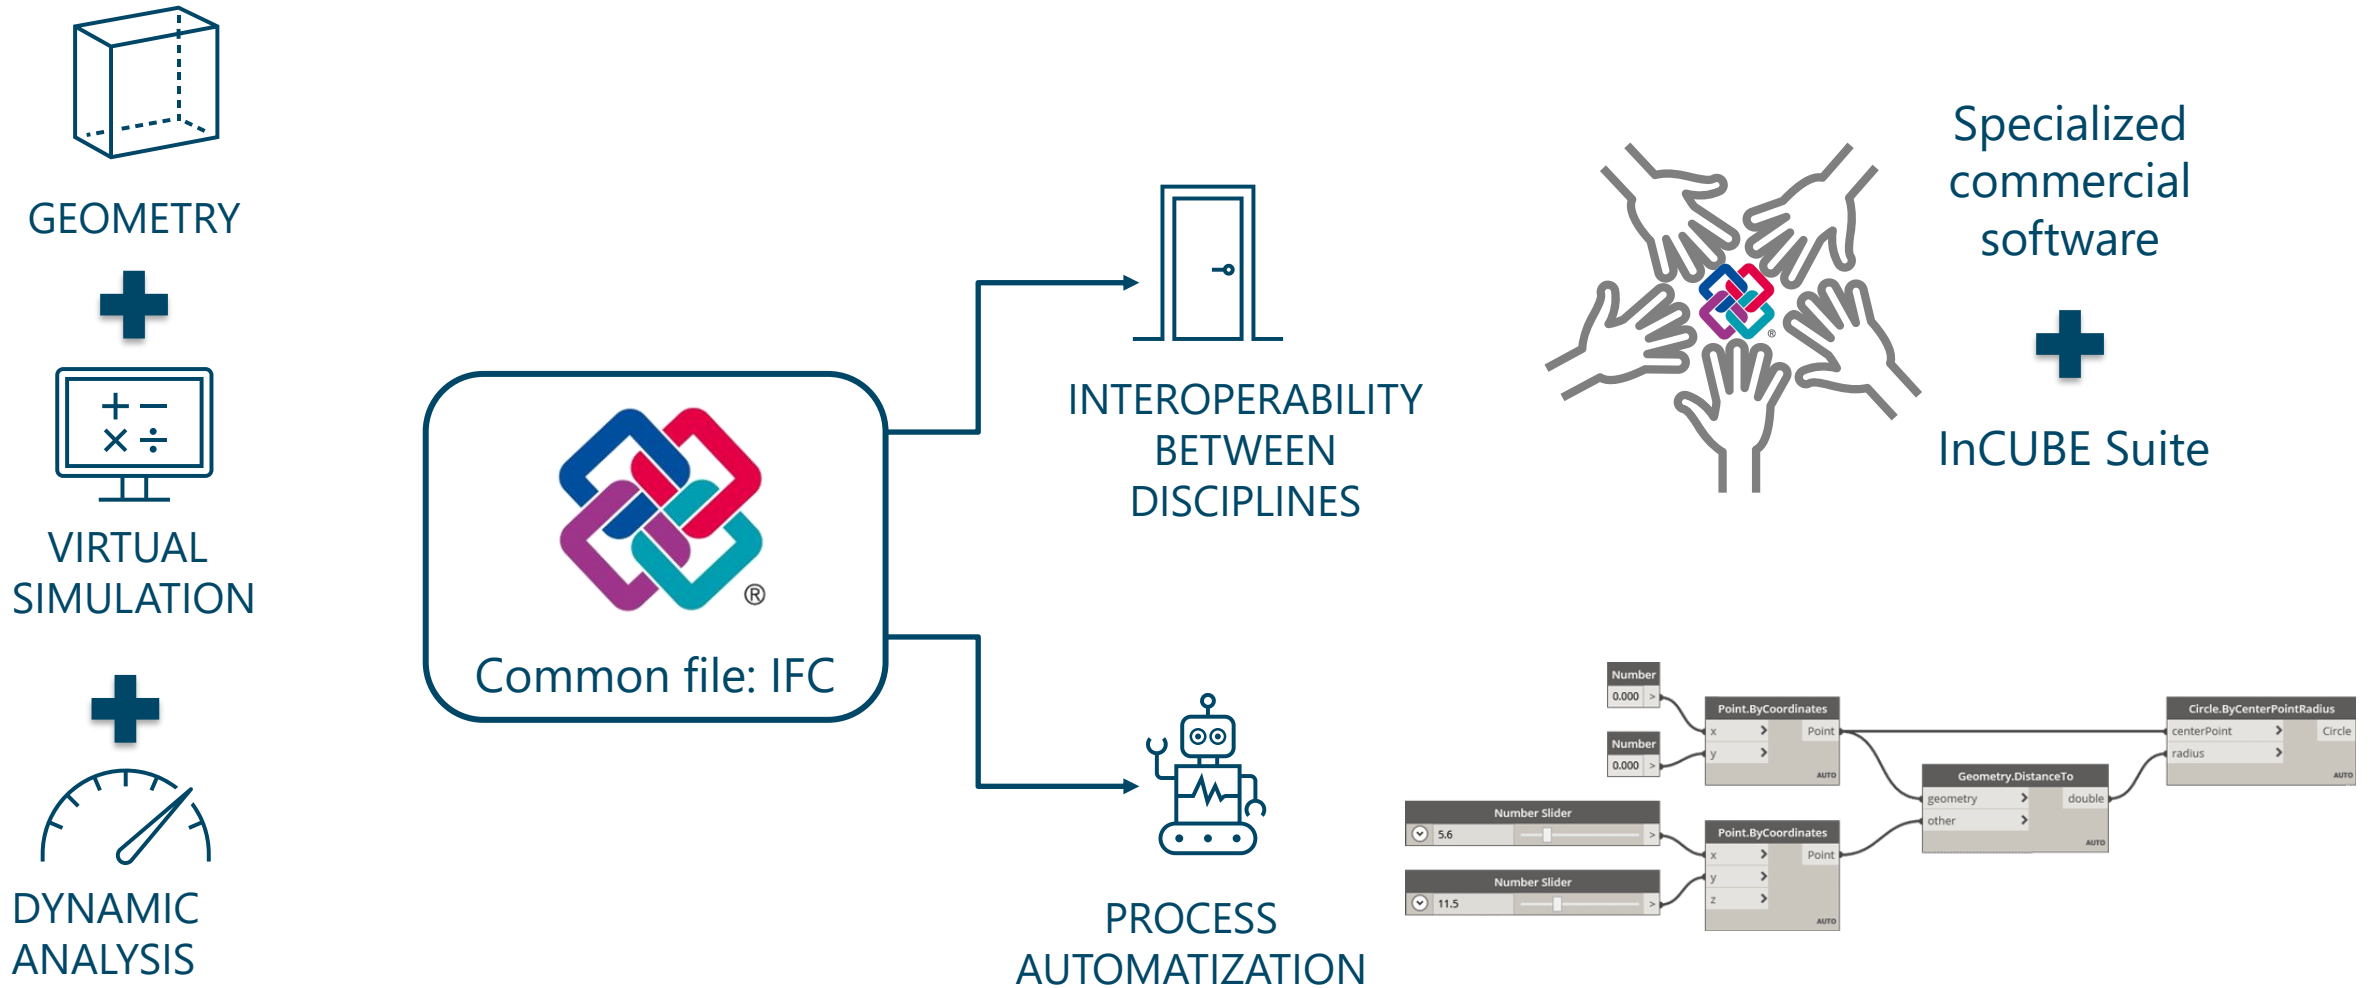

WHAT IS BUILDING INFORMATION MODELLING?

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

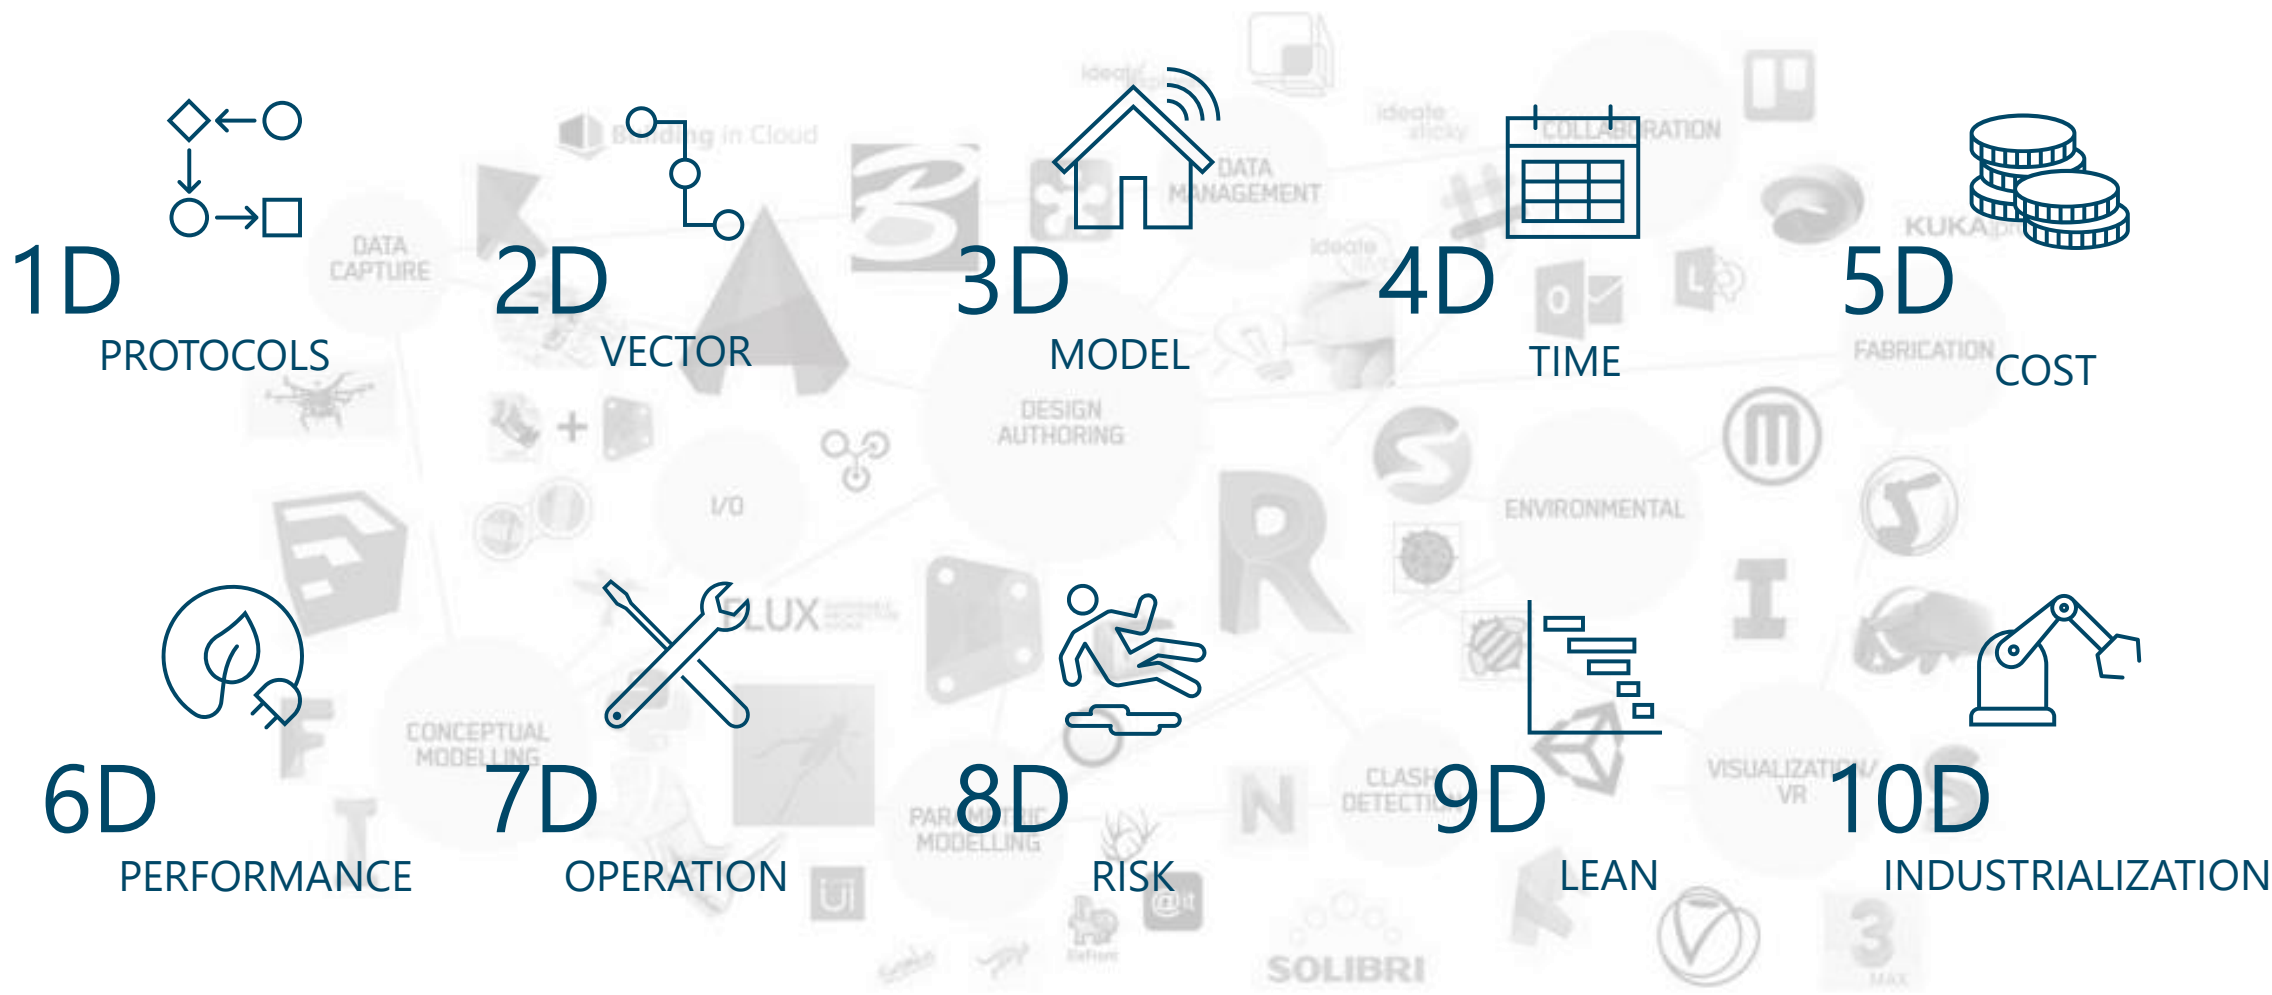

WHAT IS BUILDING INFORMATION MODELLING?

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

WHAT IS BUILDING INFORMATION MODELLING?

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

WHAT IS BUILDING INFORMATION MODELLING?

- Visualization: VR/AR
- Real time
- Better communication
- Easier to understand

 **Modelling adapted to expected uses**

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

INTRODUCING VAN WIJNEN

Construction group
More than 2400 employees
27 branches throughout the Netherlands.

- Active in project development
- Residential construction
- Renovation
- Circularity

- Coordination of Dutch demo site renovation and solutions
- Research compatibility BIM and robots
- BIM based products

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM TOOLS AND TECHNOLOGIES

Asset management

Budget management

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

INTRODUCING FBK AND 3DOM UNIT

Bruno Kessler Foundation (FBK) is a **public research center** of the Autonomous Province of **Trento** (Italy)

Some **600** employees (more than **350 researchers**, some **100 PhD students**) divided in 2 big research areas:
Science & Technologies + Humanities

3DOM (3D Optical Metrology):

Expertise in photogrammetry, 3D modeling, metrology, machine learning, sensor integration & characterization

Applied research work in the fields of Photogrammetry, Industrial Metrology, 3D Mapping, Geomatics

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

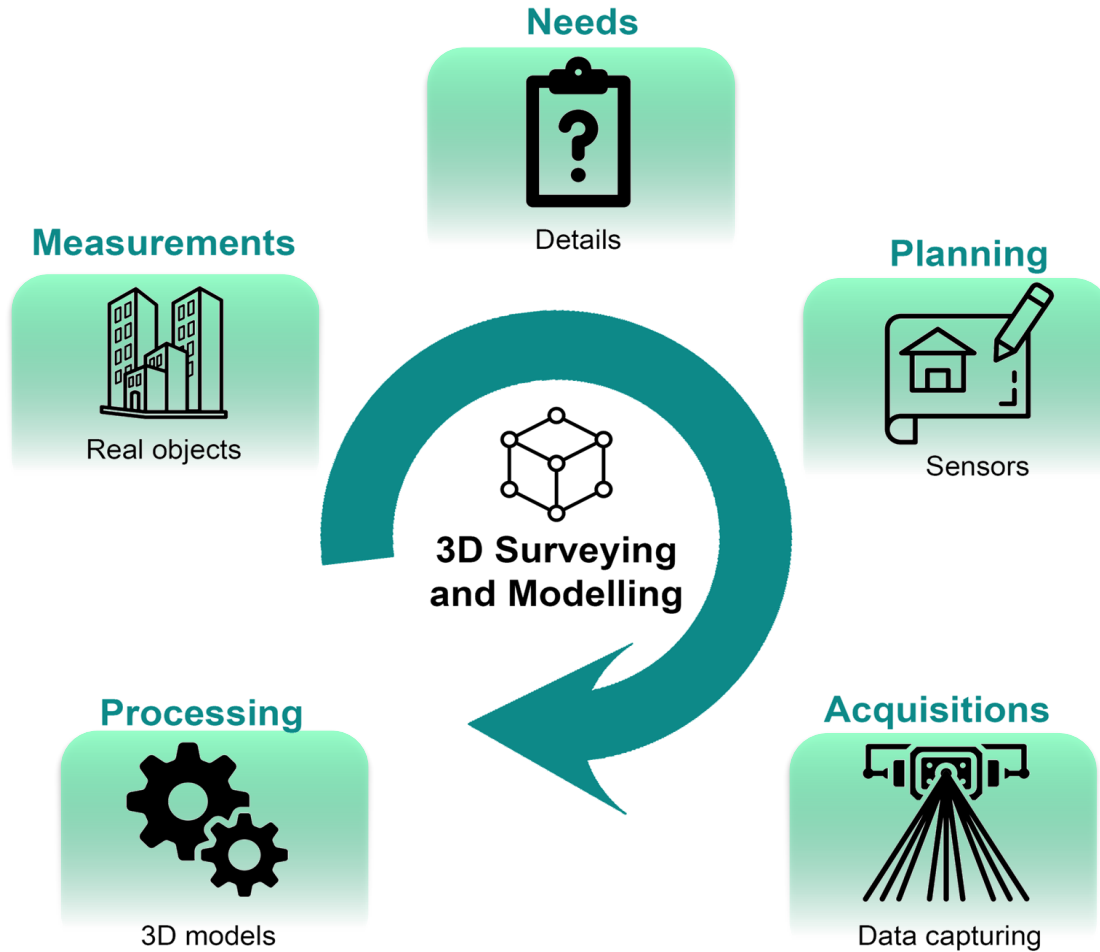

3D REALITY-BASED SURVEYING DATA

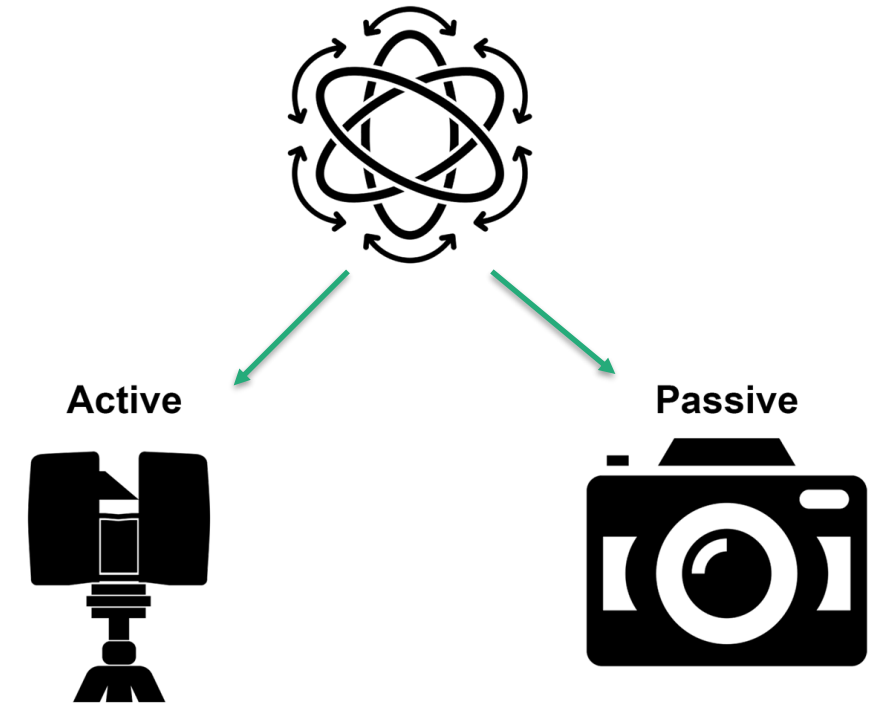

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

3D REALITY-BASED SURVEYING

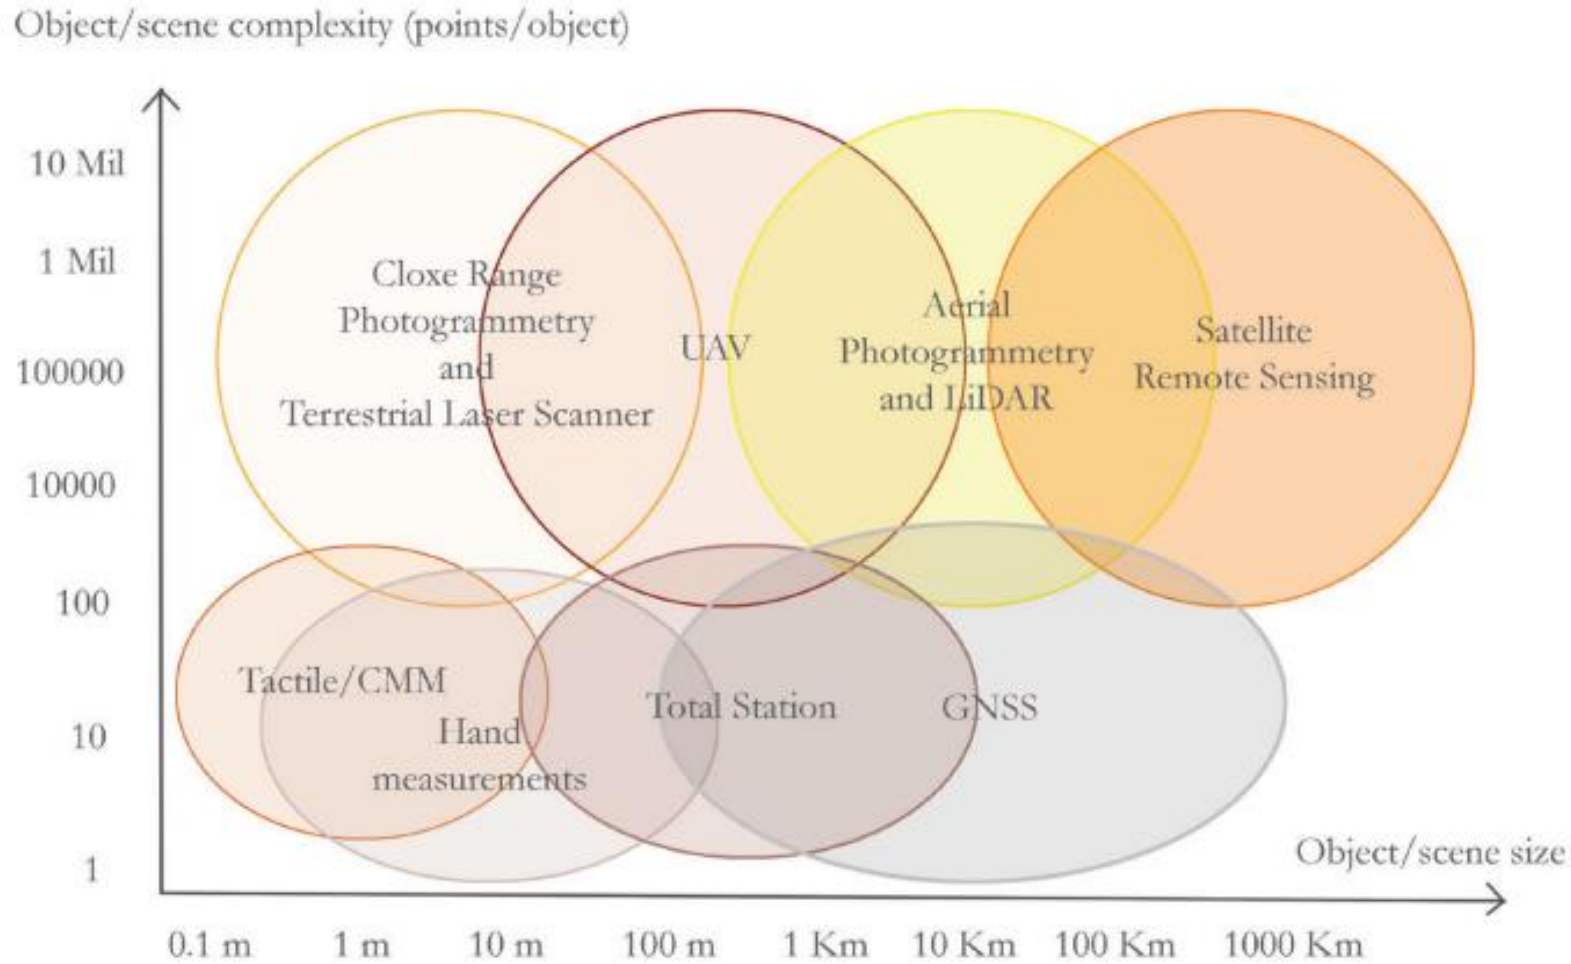

Techniques

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

SENSORS/SCALE/DETAIL

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

3D MODELLING – SOME APPLICATIONS

- Landscape/Terrain analyses

- LoD1-2 extraction

- Solar mapping

- BIM modelling

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM FROM 3D DATA: DEMO TRENTO SITE

SURVEY PHASE

- Geometrical building's data survey (referring to the existing conditions)
- Technological systems survey and detection

REGISTRATION AND ALIGNMENT OF SCANS AND PHOTOGRAMMETRIC IMAGE ORIENTATION

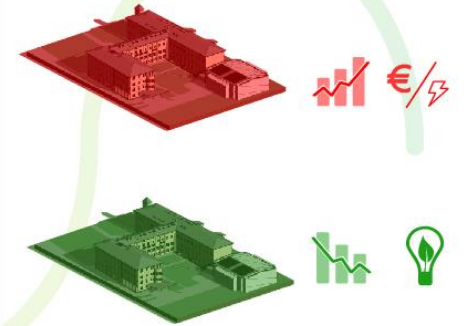

POINT CLOUD FOR BIM

BIM PROJECT FILE

BEM FILE FOR ENERGY ANALYSIS

Workflow

Santa Chiara district

Needs

- Different level of details
- 3D data manageable in BIM environment

Techniques

- Hybrid data (active and passive sensors)

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM FROM 3D DATA: DEMO TRENTO SITE

Terrestrial laser scanning (Leica RTC60)

- Acquisition and co-registration of 359 scans and panoramic images

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM FROM 3D DATA: DEMO TRENTO SITE

Mobile mapping laser scanning (Leica BLK2GO)

- 3 scans

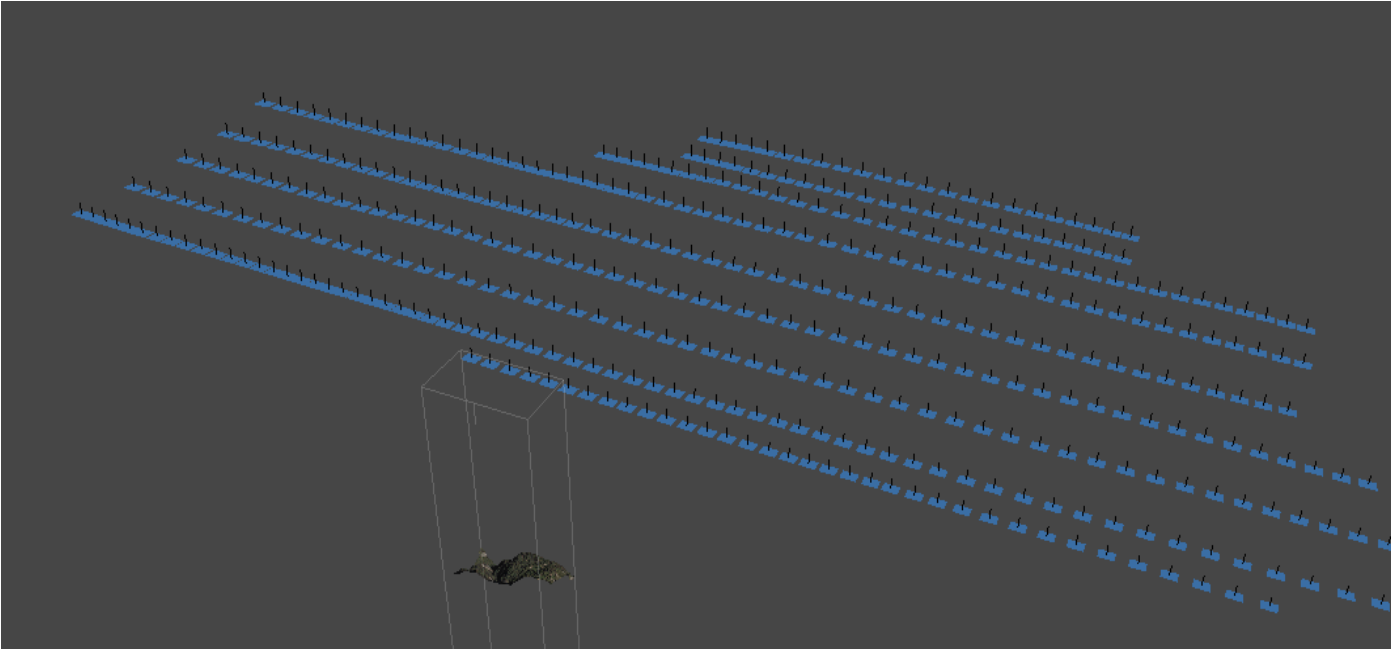

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM FROM 3D DATA: DEMO TRENTO SITE

Aerial point cloud

- Processing of available aerial data over Trento

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM FROM 3D DATA: DEMO TRENTO SITE

Data cleaning, co-registration, and merging

- Final point cloud: 278 million points

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

RESEARCH EXPERIENCE

Research experiences and outlook

- New dataset shared with the R&D community

[Roman, O., Farella, E.M., Rigon, S., Remondino, F., Ricciuti, S. and Viesi, D., 2023. From 3D surveying data to BIM to BEM: the InCUBE dataset. *The International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences*, 48, pp.175-182.]

<https://github.com/3DOM-FBK/InCUBE>

Aim / tasks

- Developing and testing automated procedure and algorithms for BIM modelling (Scan-to-BIM)
- Improve the BIM to BEM process for more effective energy analyses

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

RESEARCH EXPERIENCE

Research experiences and outlook

AUTOMATIC POINT CLOUD CLASSIFICATION

- Classes based on BIM realization
- Results with successful metrics to support automation in BIM generation

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

RESEARCH EXPERIENCE

Research experiences and outlook

AUTOMATIC WALLS EXTRACTION

- C# Add-in for Revit environment enables the semi-automatic reconstruction.

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

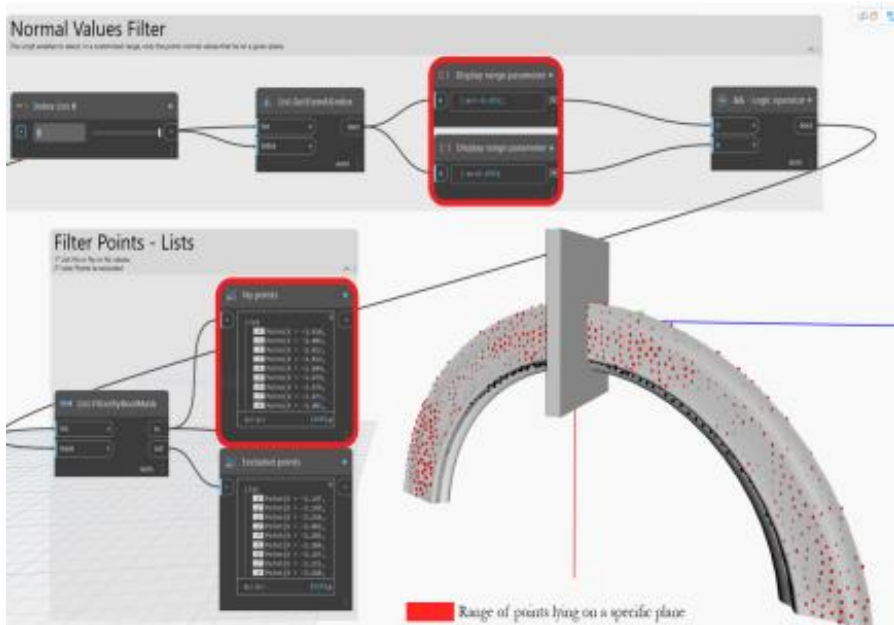

RESEARCH EXPERIENCE

Research experiences and outlook

SEMI-AUTOMATIC MODELLING OF ARCHITECTURAL ELEMENTS IN BIM ENVIRONMENT

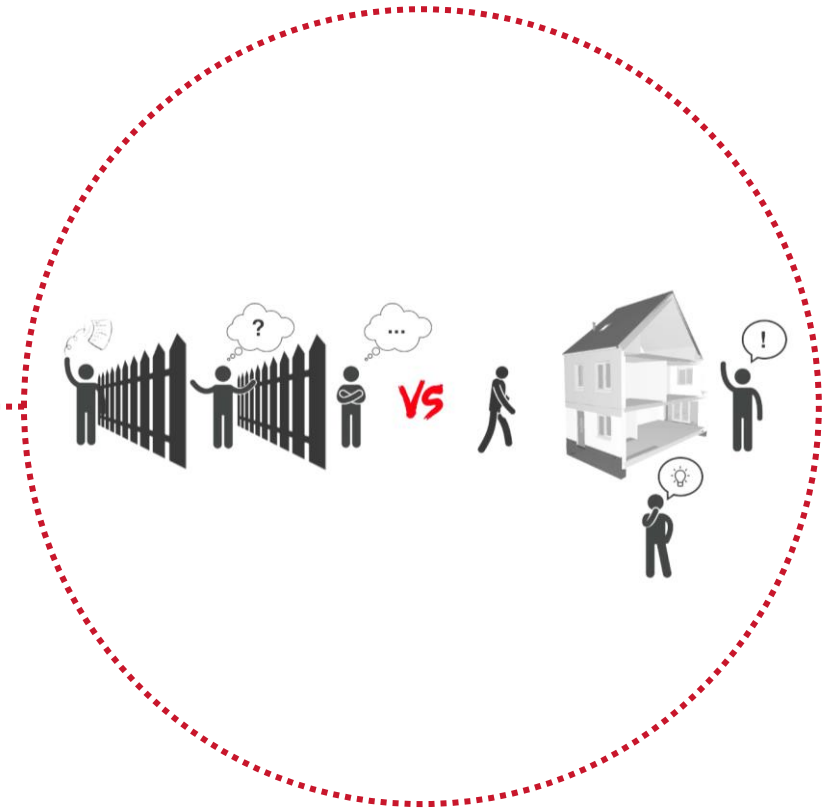

- Semi-automatic procedure based on Visual Programming Language (VPL) in Dynamo for single objects.

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM CASE STUDIES

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM CASE STUDIES

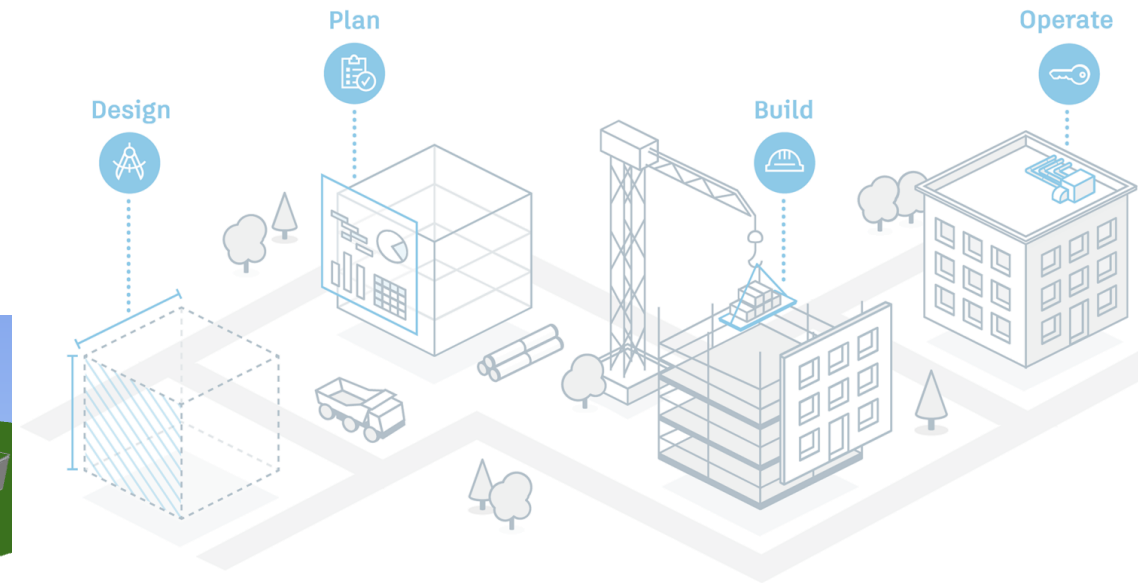

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.

BIM CASE STUDIES

School project

- Upgrade Investment +/- €3500
- Engineering 3 weeks faster
- Reduced errors during construction

This project is funded by the European Union's 'Horizon Europe Research & Innovation programme' under grant agreement no. 101069610. This publication reflects the authors' view only and the European Commission is not responsible for any use that may be made of the information it contains.
